

Testing Documentation

Eila Eco Pencils E-Commerce Platform

1. Test Strategy

Define quality objectives, testing scope, environments, responsibilities, entry and exit criteria.

Testing Notes

Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements.

2. Testing Types

Unit, Integration, System, Regression, UAT, Performance, Security, Compatibility, Accessibility.

Testing Notes

Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements.

3. Test Environment

React frontend, Node backend, Supabase, Razorpay sandbox, modern browsers, mobile devices.

Testing Notes

Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements.

4. Functional Test Cases

Validate catalog, search, filters, cart, checkout, payments, orders, admin CRUD, inquiries.

Testing Notes

Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements.

5. UI Testing

Layout consistency, responsive behavior, typography, spacing, forms, loading states, error messages.

Testing Notes

Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements.

6. API Testing

Verify request validation, authentication, response codes, payloads, payment endpoints, analytics.

Testing Notes

Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements.

7. Database Testing

CRUD validation, foreign keys, constraints, transactions, stock updates, audit logs.

Testing Notes

Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements.

8. Payment Testing

Razorpay success, cancellation, invalid signature, duplicate callback, timeout recovery.

Testing Notes

Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements.

9. Security Testing

Authentication, authorization, RLS, SQL injection prevention, XSS, CSRF, secret handling.

Testing Notes

Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements.

10. Performance Testing

Page load, API latency, pagination, image optimization, concurrent users.

Testing Notes

Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements.

11. Cross-Browser Testing

Chrome, Edge, Firefox, Safari with responsive verification.

Testing Notes

Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements.

12. UAT

Business owner validates product flow, order flow, admin operations and analytics.

Testing Notes

Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements.

13. Defect Lifecycle

New → Assigned → In Progress → Fixed → Retest → Closed.

Testing Notes

Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements.

14. Go-Live Checklist

Deployment verified, backups completed, monitoring enabled, payment tested, SEO checked.

Testing Notes

Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements.

15. Sign-Off

QA approval, stakeholder approval, production readiness confirmation.

Testing Notes

Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements. Document detailed test cases with preconditions, test data, execution steps, expected results, actual results, severity, priority, screenshots, and traceability to PRD requirements.

Sample Test Case Matrix

ID	Module	Scenario	Expected Result
TC-001	Login	Admin login	Dashboard opens
TC-002	Products	Add product	Product saved
TC-003	Cart	Add item	Cart updates
TC-004	Checkout	Valid payment	Order created
TC-005	Inventory	Low stock	Warning shown
